AK-47 Simulator: \$ 1,800.00 (less tanks and regulators)

Simulator looks and sounds like the AK-47 machine gun. It can be used with larger oxygen and propane tanks for fixed operations or vehicle borne. User can use our optional portable and refillable oxygen and propane tank and regulator setup to allow for total independent use. The simulator allows the user to simulate the AK-47 rifle for only pennies per shot. This rifle is made from some real parts and can not be made to fire any ammunition and is not classified as a real gun.

Optional portable tank set consists of a small refillable oxygen tank, refill hose, oxygen regulator and propane regulator with adapter for disposable propane bottles and carry bag for tanks and controls.

Portable Tank and Regulator Set with carry bag and fill hose: \$800.00

Total unit cost with refillable tanks option: \$2,650.00 shipping included:
